

Please insert the accompanying paper copy of the Sequence Listing, page numbers 1 to 21, at the end of the application.

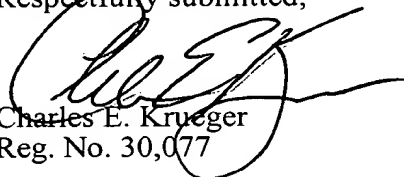

REMARKS

Applicants request entry of this amendment in adherence with 37 C.F.R. §§1.821 to 1.825. This amendment is accompanied by a floppy disk containing the above named sequences, SEQ ID NOS:1-112, in computer readable form, and a paper copy of the sequence information which has been printed from the floppy disk.

The information contained in the computer readable disk was prepared through the use of the software program "FastSEQ" and is identical to that of the paper copy. This amendment contains no new matter.

If the Examiner believes a telephone conference would expedite prosecution of this application, please telephone the undersigned at 415-576-0200.

Respectfully submitted,

Charles E. Krueger
Reg. No. 30,077

VERSION WITH MARKINGS TO SHOW CHANGES MADE

In the Specification:

Paragraph beginning at line 2 of page 22 has been amended as follows:

Once suitable primer sequences have been designed, they are preferably displayed, in any readable format, preferably along with information regarding the primers, reaction conditions, etc. Examples of information that can be displayed along with the primer sequences include, but is not limited to, the size of the primers, the size of the anticipated amplified product, the melting temperature of the primers, the G/C content of the primers, restriction sites or any other functional entities encoded in the primers, the genomic localization of the predicted amplified sequences, the cost of primer synthesis, and suitable reaction conditions for various reactions (*e.g.*, PCR) including the primers. The following is an example of a primer file:
